# Founder Message

My inspiration to establish an Interior Design and Contracting company was creativity and uniqueness. At the time of the inception of this company, there were an array of lucrative business opportunities available in the market. But what drew me to this field was 'innovation'. Innovation can not be explained without the mention of creativity. The interwoven relationship between the two ensures that one can not thrive without the other. "Creativity is thinking up of new things; whereas Innovation is doing new things." And I believe that creativity is always an antidote for monotony. My years of experience have taught me that capital and experience are both secondary to ideas. If you have ideas, you have the core ingredient for your business.

*According to W. Arthur Porter, "The innovation point is the pivotal moment when talented and motivated people seek the opportunity to act on their ideas and dreams." There is no limit to what you can do with your business as well as life with a single idea.*
